

Project meeting

Date: 2015-04-24

Facilitator: Fredrik Kindström

Participants: Axel Aringskog, Pär Löfqvist, Henrik Nilson

1. Objectives (5 min). Resolve any issues preventing the team to continue.

2. Reports (15 min) from previous meeting

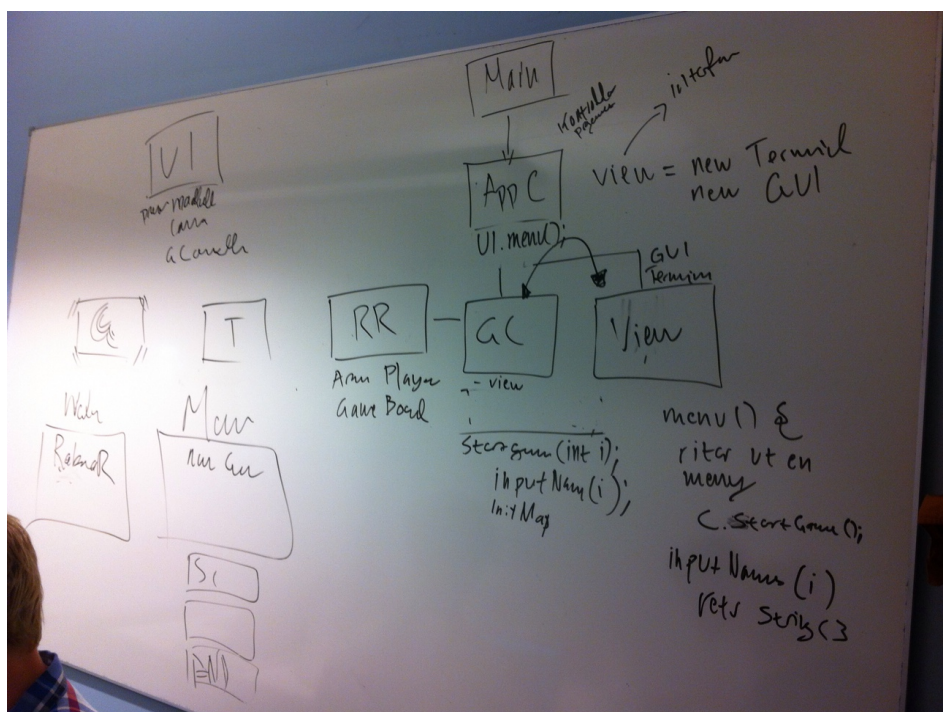

From Last meeting:

We have divided the group into two sub-groups. Henrik and Pär will focus on the backend while Fredrik and Axel will start on the GUI (frontend).

This was the plan but we encountered a big problem in the model and controller, that we had to solve before we could continue the work.

3. Discussion items (35 min)

- We encountered problems while trying to implement a new GUI besides the Terminal UI. We solved this during the week by creating a new controller and moving lots of calls to gui from the model to the new controller. The new design of the program makes it very easy to implement a new GUI. We have now discussed how we move forward with the application using the new model.
- We made a plan for the upcoming weeks all the way until deadline to get a notion of how much more we have to do.

4. Outcomes and assignments (5 min)

Axel and Fredrik will begin working on a preliminary GUI. Henrik and Pär will continue implementing the backend.

We now have a detailed, good plan for the upcoming weeks.
